CAREER OBJECTIVE

Technical and solutions-driven Junior Odoo Developer with 2+ years of experience engineering custom workflows within Sales, Inventory, POS, Purchase, and Accounting modules. Proficient in Python, Odoo ORM, and database optimization. Committed to translating complex business requirements into high-performance features while collaborating effectively within a dynamic development team.

EXPERIENCE

Navabrind IT Solutions Pvt Ltd [↗](#)

June 2025 – Present

Junior Odoo Developer

Kumbakonam, Tamil Nadu

- **POS Architecture & Workflows:** Extended a third-party POS module to capture client signatures/names via the frontend, auto-confirm delivery orders, and print Sales Order QWeb reports directly from the screen.
- **Sequential POS Pricing Engine:** Engineered session-specific tiered-discount modules that trigger automatically at minimum quantity thresholds; integrated identical pricing logic into POS-to-SO creation.
- **Magento API Synchronization:** Built custom endpoints on top of a third-party connector to handle high-speed, real-time and scheduled batch synchronization of prices and complex tier-discount mappings.
- **Data Ingestion Pipelines:** Developed an authenticated API gateway for high-volume data exchanges with an external database; handled JSON/ETIM parsing, URL-to-binary image conversions, and dynamic attribute generation.
- **High-Performance Product Importer:** Designed a multi-threaded data importer processing 1,000 rows/minute across 150 columns while maintaining system responsiveness and preventing database locking.
- **Dynamic Product Configurator:** Customized the core Sales configurator to render attribute-specific images via external web URLs instead of Odoo's binary store, adding support for on-the-fly attribute additions.
- **Procurement & Vendor Logic:** Overrode core procurement logic via custom pricelist flags to enforce distinct PO creation for individual Sales Orders instead of merging lines into existing draft vendor POs.
- **Helpdesk & CRM:** Developed a backend module to extract text arrays from vendor PDFs for line-by-line price verification against active POs; structured automated Helpdesk ticketing channels with custom routing and email aliases.

June 2024 – May 2025

Trainee Odoo Developer

Kumbakonam, Tamil Nadu

- **Dynamic Multi-Module Approval Engine:** Co-engineered a centralized approval framework from scratch for a custom module and extended it across core Odoo ecosystems; implemented dynamic domain filtering and user-to-role mappings to manage state-machine transitions and secure conditional record progression based on approval hierarchies.
- **Advanced QWeb Engine Engineering:** Re-architected legacy, table-heavy layout structures into highly responsive, visually polished, and easily customizable QWeb document reports across operational modules to enhance user readability and brand alignment.
- **Core Module Customization:** Developed core backend business logic with Python across foundational Odoo modules, including Sales, Purchase, Inventory, and HRMS ecosystems using clean inheritance models and optimized SQL database queries.
- **Version Migration & Stability:** Executed code refactoring to migrate customized modules from legacy versions to newer Odoo releases, ensuring code compatibility, cleaning deprecated methods, and maintaining system stability post-upgrade.
- **System Testing & Automation:** Gained hands-on experience structuring custom technical modules, creating dynamic email templates, and running internal system tests to isolate processing bugs and guarantee application performance quality.

EDUCATION

Bishop Heber College

08 2022 – 04 2024

Master of Computer Applications - CGPA - 8.64

Tiruchirappalli, Tamil Nadu

Government Arts College (Autonomous)

06 2019 – 05 2022

B. Sc. Mathematics - CGPA - 8.48

Kumbakonam, Tamil Nadu

TECHNICAL SKILLS

Languages/Frameworks : Python, Odoo ORM, JavaScript (POS), XML, HTML5, CSS3

Databases & Tools : PostgreSQL, SQL, Git, GitHub, MySQL, AWS (CloudWatch/Logs)

Odoo Ecosystem : Customization, Version Migration, API Integrations, QWeb & XLSX Reporting

Core Modules : Sales, Inventory, POS, Purchase, Accounting, HRMS, Rental, Helpdesk
